### **DETAILED ACTION**

This office action is in response to the amendments and arguments filed by Applicants as paper no. 6 filed May 4, 2001.

Newly submitted claims 9-14 are directed to inventions that are independent or distinct from the invention originally claimed for the following reasons:

Newly submitted claim 9 and the corresponding depending claims 10-13 are unrelated to originally filed claim 1 and dependent claims 2-7. In the instant case, a light-emitting device is one which can employ several different types of light-emitting materials in order to be luminescent, whereas a specific organic light-emitting material would not require a light-emitting device to be of use. Further, an additional search would need to be conducted for a light-emitting device because the device is composed of additional elements than just a light-emitting material, such as a combination of a film and an electric power supply unit that may or may not be welded or contacted with the film layer. Newly submitted claim 14 differs from the originally filed claims in that claim 14 is drawn to an "electric contact" which is distinct from the light-emitting diode. An electric contact may not have to be light-emitting, i.e. the property of the compound that makes up the electric contact is not necessary to the functionality of the electric contact point, whereas such a property would be key in the formation of a light-emitting diode. This difference would also result in an additional and divergent search to be performed for the additional inventions.

Consequently, newly submitted claim 9 and corresponding dependent claims 10-13 as well as the newly submitted claim 14 are divergent in subject matter from the originally presented claims and would require an additional search and examination, the following

disposition is identified. Since applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution on the merits. Accordingly, claims 9-14 are withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a).

Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Andrea M. D'souza, whose telephone number is (703) 305-0811. The examiner can normally be reached on Monday-Thursday from 8:30 AM - 7:00 PM.
